Ningrui Chen's Palindrome API
Readme

Description

This project is deployed using docker with two containers. One container is MySQL which runs in port 3306 and the other container is spring boot API which runs in port 8080. The Doc is using swagger which will up during the time running the API.

Setup

1. Go to the "mysql_image" folder in the terminal and use "docker-compose up"
2. Go to Qlik -> task folder in the terminal and use "maven clean install"
3. Go to Qlik -> task -> src -> main -> docker in the terminal and use "docker build -t qlik_image ."
4. Go to Qlik -> task -> src -> main -> docker in the terminal and use "docker-compose up"

Doc

After the API setup, go to http://localhost:8080/swagger-ui/index.html in the browser
